Welcome to the updated Cumbria road map, specially designed for coach drivers visiting the county.

The map is in its fourth incarnation and this more complete version now includes a grading scheme of Cumbria’s roads for coach usage, as recommended by local coach drivers. This has been created to make your visit to the county safe and easy. The beautiful character of the Lake District scenery is one of the main reasons your customers wish to visit and it is the very nature of this landscape which constrains the nature of our local roads - they can be narrow, steep and winding!

Cumbria - The Lake District is an area of outstanding natural beauty and for many, including your passengers, contains places for peace and relaxation. Please help preserve Cumbria as a place to live, work and visit by:

a) Only parking your coach in a designated coach parking area, or a place where your coach will not cause obstruction or annoyance to local residents and other road users.

b) Please do not leave your engine running when parked.

c) During hours of darkness please remind your passengers, when leaving the coach, to respect local residents who may be asleep.

d) If possible please plan your journey to take into account local conditions and events.

We ask that you please read the map and use it when planning your tour of the county. If you have any comments or feedback, please contact info@cumbriaevents.org
